━━ WORK EXPERIENCE

Pride Web Development

Lead PHP Developer / Architect   December 2018 - Present

- Automated projects deployment with GitLab CI.
- Migrated development and some production environments to Docker.
- Developed statistic collecting system for a healthcare organization. Like Google Sheets, but more case specific.
- Developed an advertisement platform for radio.
- Developed multiple Company Portal modules, like swag shop, goal setting, gamification/achievements.

Golden Code

Lead Web Developer   June 2015 - December 2018

- My responsibility zones were design and development of customers projects (mostly websites and web apps) and development team management.
- Introduced DevOps practices to development processes.
- Introduced Docker and Kubernetes/OpenShift for development and production environments.
- Automated projects deployment with GitLab CI.
- Speeded up the development process by migration from old-school PHP monolith to separate backend (APIs and microservices) and frontend (SPA).

━━ OPEN SOURCE

Warp

- I develop set of PHP components, that help with everyday work tasks.
- https://github.com/getwarp/warp

Cycle

- I contributed some bug fixes and optimizations to cycle/orm and cycle/database packages.
- Implemented custom "to-many" relationships with lazy collections support. https://github.com/getwarp/cycle-bridge

and more

- More my opensource projects and contributions can be found on my GitHub account: https://github.com/hustlahusky

━━ SKILLS

- PHP (Symfony, Laravel, RoadRunner, AMPHP, Composer)
- Databases (PostgreSQL, MySQL, ETL, MongoDB, Redis)
- Ops (Docker, k8s, Git, GitLab CI and GitHub Actions)
- Etc. (JavaScript, TypeScript, Angular, Node.js, HTML, CSS, JSON-API, OpenAPI/Swagger)

━━ EDUCATION

Volga State University of Telecommunications and Informatics

Bachelor's degree in computer systems and technologies   2014 - 2018

━━ LANGUAGES

- English (B2)
- Russian (Native)
